## Work Experience

### UX/UI intern&freelancer / bitWeavers Feb 2022 - *Present*

As an intern at start-up with a small team such as bitWeavers, I've been getting a golden opportunity to take on a bit more responsibility and a lot of new knowledge. I've been making prototypes in Figma, performed user tests on such prototypes, and used the results from the tests to develop parts of the GUI with React and CSS.

I currently do some UX/UI and frontend freelance work with bitWeavers.

### UX/UI intern / Redmind Oct 2021 - Dec 2021

As a part of Redmind's Talent Accelerator program, I've been part of their Design Team. I've been working on sharp projects creating prototypes, UI-designs for both apps and desktop, creating mock-ups and presentations.

### Laboratory Assistant / Karolinska Universitetssjukhuset

Jun 2017 - *Present*

For the last few years I've been working extra as a laboratory assistant at Huddinge Hospital. My work tasks include separating blood from donors into different components, sorting these, preparing them for patients or to be sold to pharmaceutical companies. I have also trained new employees.

### Technical Support / Randstad Apr 2016 - Jul 2017

As a contractor for Randstad, I worked as a technical support at Telia Company in Solna. I worked in their mobile section, giving support on errands concerning mobile network and all mobile devices.

### Technical Support / CPL Sep 2015 - Feb 2016

I worked as a contractor for CPL at Hewlett-Packard in Leixlip, Ireland. I worked in a Swedish team, and our customer was employees at PostNord. Work tasks included giving support on printers, users accounts and not too advanced problems with external software they were using.
